Elementary Education and Special Education (BA)

Nuclear Medicine Technology and Computed Tomography (BAS)
Nursing (RN-BSN)

Public Safety Administration (BAS)

**Get a head start on your bachelor's degree—
while you're still in high school!**

Early College Programs

Check out our early college programs, such as Dual Enrollment, that let you earn college credits before you even graduate from high school.

Starting Smart

Earning college credit while you're still in high school can lower your college costs significantly as well as the time it takes to earn your bachelor's degree.

Scholarships = Free Money

It's never too early to start thinking about scholarships. Once you've graduated from high school, you can begin to apply. If you have at least a 3.25 GPA, you can qualify for up to 15 credits of free tuition each semester through the Presidents' Honors Scholarship or Honors Achievement Award. (That's the equivalent of a full-time scholarship!)
