## I. Preface

The Drug-Free Schools and Campuses Regulations (34 CFR Part 86) of the Drug-Free Schools and Communities Act (DFSCA) require an institution of higher education (IHE) to certify it has adopted and implemented programs to prevent the abuse of alcohol and use or distribution of illicit drugs both by **Mesa Community College** students and employees both on its premises and as a part of any of its activities. At a minimum, each institution of higher education must annually distribute the following in writing to all students and employees:

- Standards of conduct that clearly prohibit the unlawful possession, use or distribution of illicit drugs and alcohol by students and employees
- A description of the legal sanctions under local, state, or federal law for the unlawful possession or distribution of illicit drugs and alcohol
- A description of any drug or alcohol counseling, treatment, rehabilitation, or re-entry programs that are available to students or employees
- A clear statement that the institution will impose sanctions on students and employees and a description of those sanctions, up to and including expulsion or termination of employment and referral for prosecution, for violations of the standards of conduct

The law further requires that the institution conduct a biennial review of its program with the following objectives: (1) determining the effectiveness of the policy and implementing changes to the Alcohol and Other Drug (AOD) program if they are needed; and (2) to ensure that the sanctions developed are enforced consistently.

The biennial review must also include a determination as to: (1) the number of drug- and alcohol-related violations and fatalities occurring on the campus or as part of their activities that are reported to campus officials; and (2) the number and type of sanctions the IHEs impose on students or employees as a result of such violations or fatalities.

**Mesa Community College**, a college of Maricopa County Community College District (MCCCD), acknowledges its legal obligation to conduct a biennial review of compliance with the Drug-Free Schools and Communities Act and authorized an administrative review to be conducted to determine if the College fulfills the requirements of the aforementioned Federal regulations.

The intent of this document is to:

- 1. Meet the legal requirement of conducting a biennial review
- 2. Review and summarize the programs and activities related to alcohol and drug during **2020** and **2021 calendar years**.

#### **Impact of COVID-19 Pandemic**

The Mesa Community College campuses closed on March 16, 2020 due to the COVID-19 Pandemic. All classes and services were moved to remote formats, with employees working remotely from home offices. All events were virtual from March 16, 2020 until August 2021. Students, faculty, and staff began to return to the campus on a limited basis for the Fall 2021 semester. Beginning in August 2021 and programs and services were offered in-person, virtually, or using hybrid formats.. Many courses, programs, and services continued to be provided using virtual or hybrid modalities through the end of 2021.
